

Announcement

Bank Brokers establishes in Spain

Bank Brokers continues its European growth strategy by opening offices in the Spanish capital, Madrid. Today we are in 7 countries and we have 60 employees. In 2017, we have assisted more than 200 companies with financial advisory services. The quality assurance of the financial contracting continues being the main product of the Group.

CEO Trond Tidemann says the company is proud to have contributed significant value creation for its clients since its inception in 2008. The Group's internationalization process is a key reason for success as many of the clients are important international companies.

Spain represents a wide range of opportunities for financial advice, and our pre-establishment research confirms that our unique concept of "no cure no pay" will work very well in the Spanish market.

We are proud to join Erik Vermeulen in the team as Country Manager in Spain. Erik has more than 25 years of experience in the Spanish market, where he decisively contributed to the constitution and subsequent growth of the Spanish office of Rabobank.

He has important knowledge about the financial markets and a broad relationship platform that will help ensure the Spanish success of Bank Brokers.
